

THE ADVISORS' INNER CIRCLE FUND II (the "Trust")

**Hancock Horizon Burkenroad Small Cap Fund
Hancock Horizon Diversified Income Fund
Hancock Horizon Diversified International Fund
Hancock Horizon Dynamic Asset Allocation Fund
Hancock Horizon International Small Cap Fund
Hancock Horizon Louisiana Tax-Free Income Fund
Hancock Horizon Microcap Fund
Hancock Horizon Mississippi Tax-Free Income Fund
Hancock Horizon Quantitative Long/Short Fund
(each, a "Fund" and together, the "Funds")**

**Supplement dated May 26, 2021
to each Fund's Summary Prospectus (the "Summary Prospectuses"), Prospectus (the "Prospectus")
and Statement of Additional Information (the "SAI"),
each dated May 1, 2021**

This supplement provides new and additional information beyond that contained in the Summary Prospectuses, Prospectus and SAI, and should be read in conjunction with the Summary Prospectuses, Prospectus and SAI.

As publicly announced on April 26, 2021, Horizon Advisers ("Horizon"), the Funds' investment adviser, and Federated Hermes, Inc. ("Federated Hermes") have entered into a definitive purchase agreement pursuant to which Federated Hermes has agreed to acquire certain investment management related assets of Horizon (the "Transaction"). In anticipation of the Transaction, the Board of Trustees of the Trust has approved nine Agreements and Plans of Reorganization providing for the reorganization (each, a "Reorganization") of the Funds into the following funds within the Federated Hermes Funds mutual fund complex (each, an "Acquiring Fund" and together, the "Acquiring Funds") currently or to be managed by certain Federated Hermes-affiliated registered investment advisers:

| Fund | Acquiring Fund |
|--|---|
| Hancock Horizon Burkenroad Small Cap Fund | Federated Hermes MDT Small Cap Core Fund, an existing series of Federated Hermes MDT Series |
| Hancock Horizon Diversified Income Fund | Federated Hermes Capital Income Fund, an existing series of Federated Hermes Income Securities Trust |
| Hancock Horizon Diversified International Fund | Federated Hermes International Leaders Fund, an existing series of Federated Hermes World Investment Series, Inc. |
| Hancock Horizon Dynamic Asset Allocation Fund | Federated Hermes Global Allocation Fund |
| Hancock Horizon International Small Cap Fund | Federated Hermes International Small-Mid Company Fund, an existing series of Federated Hermes World Investment Series, Inc. |
| Hancock Horizon Louisiana Tax-Free Income Fund | Federated Hermes Municipal Bond Fund, Inc. |
| Hancock Horizon Microcap Fund | Federated Hermes MDT Small Cap Core Fund, an existing series of Federated Hermes MDT Series |
| Hancock Horizon Mississippi Tax-Free Income Fund | Federated Hermes Municipal Bond Fund, Inc. |
| Hancock Horizon Quantitative Long/Short Fund | Federated Hermes MDT Market Neutral Fund, a new series of Federated Hermes Adviser Series |

The Acquiring Funds and the Funds have similar investment objectives, principal investment strategies, investment policies and principal risks. Following the closing of the Reorganizations, the portfolio management teams for the Acquiring Funds will be different than the portfolio management teams that currently manage the Funds because Horizon will not serve as investment adviser or sub-adviser to any of the Acquiring Funds, EARNEST Partners, LLC, the investment sub-adviser to the Hancock Horizon Diversified International Fund, will not serve as investment adviser or sub-adviser to the Federated Hermes International Leaders Fund, and GlobeFlex Capital, LP, the investment sub-adviser to the Hancock Horizon International Small Cap Fund, will not serve as investment adviser or sub-adviser to the Federated Hermes International Small-Mid Company Fund. The Reorganizations are intended to be tax-free, meaning that the Funds' shareholders would become shareholders of the Acquiring Funds upon closing of the Reorganizations without realizing any gain or loss for federal tax purposes.

The Reorganizations are subject to shareholder approval, though no shareholder action is necessary at this time. Shareholders of record of the Funds on or about June 14, 2021 will receive a proxy statement/prospectus that contains important information about their Reorganization and the Acquiring Fund in which they would own shares upon closing of the Reorganization, including information about investment strategies and risks, fees and expenses. Prior to the Reorganizations, Fund shareholders may continue to purchase, redeem and exchange their shares subject to the limitations described in the Prospectuses. The Funds may stop accepting new accounts and/or investments from existing accounts a few days prior to the Closing Date of the Reorganizations in order to facilitate the orderly transfer of portfolio securities to the Acquiring Funds as part of the Reorganizations. If shareholders approve the Reorganizations and other closing conditions are met, the Reorganizations are anticipated to close on or about September 24, 2021.

The foregoing is not an offer to sell, nor a solicitation of an offer to buy, shares of the Funds or the Acquiring Funds, nor is it a solicitation of any proxy. When it is available, please read the proxy statement/prospectus carefully before making any decision to invest or when considering the Reorganizations. The proxy statement/prospectus will be available for free on the SEC's website (www.sec.gov).

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE

Hancock Horizon Dynamic Asset Allocation Fund

Institutional Class Shares: HDAIX

Investor Class Shares: HDAAX

SUMMARY PROSPECTUS

May 1, 2021

Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://hancockhorizon.com/FundInvestors/Literature.aspx>. You can also get this information at no cost by calling 1-888-422-2654, by sending an e-mail request to information@hancockhorizon.com, or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated May 1, 2021, as they may be amended from time to time, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

Hancock Horizon Dynamic Asset Allocation Fund

Investment Objective

The Hancock Horizon Dynamic Asset Allocation Fund (the “Dynamic Asset Allocation Fund” or the “Fund”) seeks long-term capital appreciation.

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Institutional Class Shares, which are not reflected in the table below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

| | Institutional Class Shares | Investor Class Shares |
|---|---------------------------------------|----------------------------------|
| Management Fees | 0.70% | 0.70% |
| Other Expenses ¹ | 0.60% | 0.84% |
| Shareholder Servicing Fees | None | 0.25% |
| Other Operating Expenses | 0.60% | 0.59% |
| Acquired Fund Fees and Expenses | 0.22% | 0.22% |
| Total Annual Fund Operating Expenses ² | 1.52% | 1.76% |

¹ Effective August 18, 2020, the Fund’s fiscal year end changed from January 31 to December 31. Therefore, “Other Expenses” shown are annualized for the period from February 1, 2020 through December 31, 2020.

² The Total Annual Fund Operating Expenses in this fee table do not correlate to the expense ratios in the Fund’s Financial Highlights because the Financial Highlights include only the direct operating expenses incurred by the Fund, and excluded Acquired Fund Fees and Expenses.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

| | 1 Year | 3 Years | 5 Years | 10 Years |
|----------------------------------|---------------|----------------|----------------|-----------------|
| Institutional Class Shares | \$155 | \$480 | \$829 | \$1,813 |
| Investor Class Shares | \$179 | \$554 | \$954 | \$2,073 |

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund’s performance. During the fiscal period from February 1, 2020 to December 31, 2020, the Fund’s unannualized portfolio turnover rate was 131% of the average value of its portfolio.

Principal Investment Strategy

The Fund is designed to provide diversification among various asset classes by investing its assets in a combination of exchange-traded funds (“ETFs”). ETFs are pooled investment vehicles, such as registered investment companies, grantor trusts and publicly traded partnerships, whose shares are listed and traded on stock exchanges or otherwise traded in the over-the-counter market.

Horizon Advisers (the “Adviser”) buys and sells certain broad-based ETFs (“Underlying ETFs”) for the Fund based on its analysis of trends in equity, fixed income and alternative asset classes. The equity Underlying ETFs in which the Fund invests include those that attempt to track the price movements of common stocks, preferred stocks, and convertible securities. The fixed income Underlying ETFs in which the Fund invests include those that attempt to track the price movements of securities issued or guaranteed by the U.S. Government and its agencies or instrumentalities, foreign sovereign debt, municipal bonds, corporate obligations, residential and commercial mortgage-backed securities, and asset-backed securities. The Underlying ETFs may attempt to track the price movements of fixed income securities of any credit quality, including those that are rated below investment grade (“high yield” or “junk” bonds). The alternative Underlying ETFs in which the Fund invests include those that attempt to track the price movements of commodities, real estate investment trusts (“REITs”) and master limited partnerships (“MLPs”). The Underlying ETFs may use derivatives, principally futures contracts, forward contracts, options and swaps, to achieve their investment objectives.

The Fund will invest in Underlying ETFs that may attempt to track the price movements of assets throughout the world, including securities of companies in both developed and emerging market countries. The Fund may buy and sell investments frequently, which could result in a high portfolio turnover rate.

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and is not insured or guaranteed by the FDIC, or any government agency.** The principal risks affecting shareholders’ investments in the Fund are set forth below.

Asset Allocation Risk — The Fund is subject to asset allocation risk, which is the risk that the Adviser's allocation of the Fund's assets among the various asset classes and selection of the Underlying ETFs will cause the Fund to underperform other funds with a similar investment objective and/or underperform the markets in which the Fund invests.

Market Risk — The prices of and the income generated by the Fund's securities may decline in response to, among other things, investor sentiment, general economic and market conditions, regional or global instability, and currency and interest rate fluctuations. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund.

Underlying ETFs Investment Risk — The Fund's investments in Underlying ETFs will subject it to substantially the same risks as those associated with the direct ownership of the securities in which such Underlying ETFs invest. As a shareholder of an Underlying ETF, the Fund relies on the Underlying ETF to achieve its investment objective. If the Underlying ETF fails to achieve its objective, the value of the Fund's investment could decline, which could adversely affect the Fund's performance. By investing in an Underlying ETF, Fund shareholders indirectly bear the Fund's proportionate share of the fees and expenses of the Underlying ETF, in addition to the fees and expenses that Fund shareholders directly bear in connection with the Fund's own operations.

Because the value of the Underlying ETFs depends on the demand in the market, they may trade at a discount or premium to their net asset value and the Adviser may not be able to liquidate the Fund's holdings at the most optimal time, which could adversely affect Fund performance. Investments in Underlying ETFs are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund.

Before investing in the Fund, investors should assess the risks associated with the Underlying ETFs and the types of investments made, or tracked, by the Underlying ETFs. These risks include any combination of the risks described below, although the Fund's exposure to a particular risk will depend on its allocations to the Underlying ETFs.

Equity Risk — Investments in common stocks are subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity market has moved in cycles, and the value of equity securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response.

Emerging Markets Securities Risk — Investments in emerging markets securities are considered speculative and subject to heightened risks in addition to the general risks of investing in non-U.S. securities. Unlike more established markets, emerging markets may have governments that are less stable, markets that are less liquid and economies that are less developed. In addition, the securities markets of emerging market countries may consist of

companies with smaller market capitalizations and may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. Furthermore, foreign investors may be required to register the proceeds of sales, and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies. Moreover, the currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to investments in these currencies. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

Foreign Company Risk — Investing in foreign companies poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the United States. In addition, investments in foreign companies are generally denominated in a foreign currency, the value of which may be influenced by currency exchange rates and exchange control regulations. Changes in the value of a currency compared to the U.S. dollar may affect (positively or negatively) the value of foreign investments. These currency movements may occur separately from, and in response to, events that do not otherwise affect the value of the security in the issuer's home country. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission and foreign companies are generally not subject to the regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities may be reduced by a withholding tax at the source, which tax would reduce income received from the securities. Foreign securities may also be more difficult to value than securities of U.S. issuers. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund.

Commodities Risk — The prices of physical commodities (such as energy, minerals, or agricultural products) may be affected by factors such as natural disasters, weather, and U.S. and international economic, political and regulatory developments. The prices of commodities can also fluctuate due to supply and demand disruptions in major producing or consuming regions, as well as temporary distortions in the commodities markets due to, among other factors, lack of liquidity, the participation of speculators, and government regulation and other actions.

MLPs Risk — MLPs are limited partnerships in which the ownership units are publicly traded. MLPs often own several properties or businesses (or own interests) that are related to oil and gas industries or other natural resources, but they also may finance other projects. To the extent that an MLP's interests are all in a particular industry, the MLP will be negatively impacted by economic events adversely impacting that industry. Additional risks of investing in a MLP also include those involved in investing in a partnership as opposed to a corporation,

such as limited control of management, limited voting rights and tax risks. MLPs may be subject to state taxation in certain jurisdictions, which will have the effect of reducing the amount of income paid by the MLP to its investors.

REITs Risk — REITs are pooled investment vehicles that own, and usually operate, income-producing real estate. REITs are susceptible to the risks associated with direct ownership of real estate, such as the following: (i) declines in property values; (ii) increases in property taxes, operating expenses, interest rates or competition; (iii) overbuilding; (iv) zoning changes; and (v) losses from casualty or condemnation.

Derivatives Risk — Derivatives are often more volatile than other investments and may magnify gains or losses. Successful use of a derivative depends upon the degree to which prices of the underlying assets correlate with price movements in the derivatives purchased or sold. The lack of a liquid secondary market for a derivative may prevent the closing of derivative positions and could adversely impact the ability to realize profits or limit losses. Because derivative instruments may be purchased for a fraction of the market value of the investments underlying such instruments, a relatively small price movement in the underlying investment may result in an immediate and substantial gain or loss. Derivatives are often more volatile than other investments and more can be lost from a derivative than the amount originally invested in it.

High Yield Securities Risk — High yield, or “junk,” bonds are highly speculative securities that are usually issued by smaller, less credit worthy and/or highly leveraged (indebted) companies. Compared with investment grade bonds, high yield bonds are considered to carry a greater degree of risk and are considered to be less likely to make payments of interest and principal. Market developments and the financial condition of the issuer of these securities generally influence their price and liquidity more than changes in interest rates, when compared to investment grade debt securities. Insufficient liquidity in the non-investment grade bond market may make it more difficult to dispose of non-investment grade bonds, and a lack of reliable, objective data or market quotations may make it more difficult to value non-investment grade bonds accurately.

Preferred Stocks Risk — Preferred stocks are sensitive to interest rate changes, and are also subject to equity risk, which is the risk that stock prices will fall over short or extended periods of time. The rights of preferred stocks on the distribution of a company’s assets in the event of a liquidation are generally subordinate to the rights associated with a company’s debt securities.

Convertible Securities Risk — The value of a convertible security is influenced by changes in interest rates (with investment value declining as interest rates increase and increasing as interest rates decline) and the credit standing of the issuer. The price of a convertible security will also normally vary in some proportion to changes in the price of the underlying common stock because of the conversion or exercise feature.

Asset-Backed Securities Risk — Asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as additional risks associated with the nature of the assets and the servicing of those assets. Some asset-backed securities present

credit risks that are not presented by mortgage-backed securities. This is because certain asset-backed securities do not have the benefit of a security interest in collateral that is comparable in quality to mortgage assets. Moreover, the value of the collateral may be insufficient to cover the principal amount of the obligation. Other asset-backed securities do not have the benefit of a security interest in collateral at all.

Foreign Sovereign Debt Securities Risk — The risks that: (i) the governmental entity that controls the repayment of sovereign debt may not be willing or able to repay the principal and/or interest when it becomes due, due to factors such as debt service burden, political constraints, cash flow problems and other national economic factors; (ii) governments may default on their debt securities, which may require holders of such securities to participate in debt rescheduling or additional lending to defaulting governments; and (iii) there is no bankruptcy proceeding by which defaulted sovereign debt may be collected in whole or in part.

Fixed Income Securities Risk — The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers, including governments. Generally, fixed income securities will decrease in value if interest rates rise, and vice versa. Interest rate risk is generally greater for lower-rated securities and securities with longer maturities or durations.

The credit rating or financial condition of an issuer may affect the value of a debt security. Generally, the lower the quality rating of a security, the greater the risk that the issuer will fail to pay interest fully and return principal in a timely manner. If an issuer defaults or becomes unable to honor its financial obligations, the security may lose some or all of its value. The issuer of an investment grade security is more likely to pay interest and repay principal than an issuer of a lower-rated bond. Adverse economic conditions or changing circumstances, however, may weaken the capacity of the issuer to pay interest and repay principal.

Mortgage-Backed Securities Risk — The mortgages underlying mortgage-backed securities may be paid off early, which makes it difficult to determine their actual maturity and therefore difficult to calculate how they will respond to changes in interest rates. Prepaid amounts may have to be re-invested at lower interest rates.

Municipal Securities Risk — Municipal securities are susceptible to adverse economic, political or regulatory changes that may impact the ability of municipal issuers to repay principal and to make interest payments. Changes in the financial condition or credit rating of municipal issuers also may adversely affect the value of municipal securities. Constitutional or legislative limits on borrowing by municipal issuers may result in reduced supplies of municipal securities. Moreover, certain municipal securities are backed only by a municipal issuer's ability to levy and collect taxes.

U.S. Government Securities Risk — Investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities. Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. There can be no assurance that the U.S. government would provide financial support to its agencies or

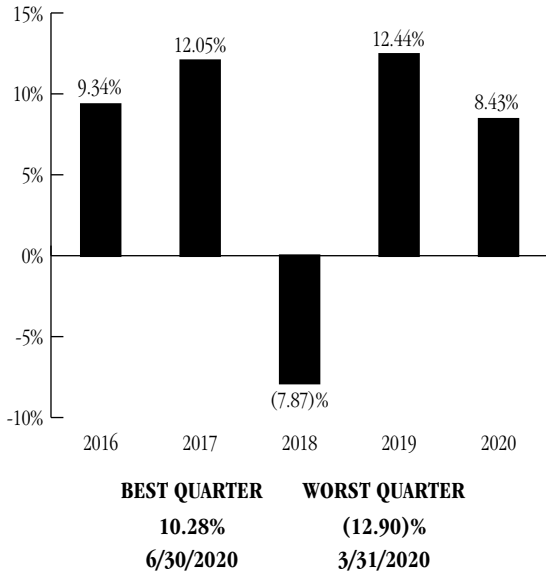

instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. In addition, U.S. government securities are not guaranteed against price movements due to changing interest rates.

Portfolio Turnover Risk — The Fund is subject to portfolio turnover risk since it may buy and sell investments frequently. Such a strategy often involves higher expenses, including brokerage commissions, and may increase the amount of capital gains (in particular, short term gains) realized by the Fund. Shareholders may pay tax on such capital gains.

Performance Information

The bar chart and the performance table below illustrate the risks and volatility of an investment in the Fund by showing changes in the Fund’s Institutional Class Shares’ performance from year to year and by showing how the Fund’s average annual total returns for 1 and 5 years and since inception compare with those of a broad measure of market performance.

Of course, the Fund’s past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.hancockhorizonfunds.com.

The performance information shown above is based on a calendar year. The Fund’s Institutional Class Shares’ performance from 1/1/21 to 3/31/21 was 3.30%.

Average Annual Total Returns for Periods Ended December 31, 2020

This table compares the Fund's average annual total returns for the periods ended December 31, 2020 to those of appropriate broad based indices.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts ("IRAs"). After-tax returns are shown for Institutional Class Shares only. After-tax returns for other classes will vary.

| DYNAMIC ASSET ALLOCATION FUND | 1 Year | 5 Years | Since Inception (5/29/2015) |
|--|--------|---------|-----------------------------------|
| Fund Returns Before Taxes | | | |
| <i>Institutional Class Shares</i> | 8.43% | 6.59% | 3.63% |
| <i>Investor Class Shares</i> | 8.14% | 6.33% | 3.37% |
| Fund Returns After Taxes on Distributions | | | |
| <i>Institutional Class Shares</i> | 8.34% | 6.25% | 3.32% |
| Fund Returns After Taxes on Distributions and Sale of Fund Shares | | | |
| <i>Institutional Class Shares</i> | 5.05% | 5.08% | 2.74% |
| MSCI ACWI (reflects no deduction for fees, expenses or taxes) | 16.25% | 12.26% | 9.43% |
| Bloomberg Barclays U.S. Aggregate Bond Index ("Barclays Index") (reflects no deduction for fees, expenses or taxes) | 7.51% | 4.44% | 3.88% |
| 50/50 Hybrid of the MSCI ACWI and Barclays Index | 12.64% | 8.60% | 5.10% |
| HFRI Macro Multi Strategy Index (reflects no deduction for fees, expenses or taxes) | 4.22% | 3.25% | 2.34% |

Investment Adviser

Horizon Advisers

Portfolio Managers

Austin Zaunbrecher, CFA, Lead Portfolio Manager for the Fund, joined the Adviser in 2013 and has served on the portfolio team for the Fund since its inception in 2015.

Bryan McCaulley, CFA, Portfolio Manager, joined the Adviser in 2010 and has served on the portfolio team for the Fund since 2019.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or IRA, in which case your distribution will be taxed when withdrawn from the tax-deferred account.

Purchasing and Selling Fund Shares

Shares of the Fund can generally only be purchased through an account with an investment professional or other institution. To purchase shares of the Fund for the first time, you must invest at least \$1,000. Subsequent investments in the Fund must be made in amounts of at least \$100.

The Fund's shares are redeemable. If you own your shares through an account with an investment professional or other institution, you may redeem your shares on any day that the New York Stock Exchange (the "NYSE") is open for business (a "Business Day") by contacting that investment professional or institution to redeem your shares. Your broker or institution may charge a fee for its services in addition to the fees charged by the Fund.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
