ACH Input File Structure

The NACHA format is composed of 94 character records. All records and fields are required, except the record 7 – Entry Detail Addenda Record that is optional. *See the next page for a list of acceptable characters.*

Record Title

Record Type Code

File Header Record – This record includes your company name and company number. It also designates the immediate destination (Hancock/Whitney Bank) of the entries contained within the file.

1

Batch Header Record – This record indicates the effective entry date (the date you request the deposits/debits to be settled). In addition, this record identifies your company and provides an entry description for the credit and debits in this batch.

5

Entry Detail Record – This record contains the information necessary to post a deposit to/withdrawal from an account, such as recipient's name, account number, dollar amount of the payment.

6

Entry Detail Addenda Record – This record is *optional*. This record contains additional information relating to the prior entry detail record. It is primarily used for CCD+ and CTX, which are corporate to corporate transactions.

7

Batch Control Total – This record appears at the end of each batch and contains totals for the batch.

8

File Control Record – This record provides a final check on the data submitted. It contains block and batch count(s) and totals for each type of entry.

Identification of ACH Items on Receivers' Bank Statement

The following fields are considered "descriptive" fields and may be printed on receiver's account statement exactly as provided by your company in your ACH origination file. The determination of what is printed on the receiver's account statement varies by Receiving Financial Institution.

Field Name	Location on ACH File	Record Field	Positions	Number of Characters
Company Name	Batch Header	5	05-20	16
Company Entry Description	Batch Header	5	54-63	10
Company Descriptive Date	Batch Header	5	64-69	6
Individual Identification	Entry Detail	6	40-54	15

NACHA Record Format

The following pages outline the ACH record formats. The File Header and File Control records act as the outermost envelope of an ACH transaction. The Batch Header and Batch Control records act as an inner envelope combining similar entries. Please note that when the field inclusion requirements are R=Required or M=Mandatory, these fields must be filled-in.
